POTENTIAL

However...

Governance

Latency

Crypto-currency

No Privacy

Limited Throughput

No Finality

Challenge

Space: the final frontier. These are the voyages of the starship Enterprise. Its five-year mission: to explore strange new worlds. To seek out new life and new civilizations. To boldly go where no man has gone before!

Challenge

Achieve consensus at scale with high transaction throughput and sufficiently low latency to commitment to meet enterprise needs, while enabling privacy where appropriate.

Joy's Law

“No matter who you are,
most of the smartest
people work for someone
else” – Bill Joy
